Summary

Java Developer with 3 years of experience building and maintaining enterprise applications using **Java, Spring Boot, REST APIs, IBM MQ, Redis, and SQL**, with experience in backend performance optimization, event-driven processing, production troubleshooting, secure coding, and mentoring engineers.

Experience

Software Developer — Java Developer — Module Lead Oct 2023 – Present
Tata Consultancy Services (TCS) Limited

- **Leading a module of 4 engineers**, driving application design, code reviews, mentoring, and cross-functional delivery with QA and client teams.
- Reduced batch processing time by **50%** by optimizing Java batch workflows through parallel execution, Redis-based caching, and efficient task partitioning for high-volume workloads.
- Contributed to the design and development of **high-throughput, event-driven backend services** processing **800K+ records in under 20 minutes** using file-splitting techniques and **IBM MQ**, with fault handling and performance optimization.
- Contributed to **Redis-based rate limiting and JWT authentication** using Spring Boot, helping reduce peak-period server load by **30%** and strengthen access control.
- Contributed to automated inbound file processing using scheduled Spring Boot jobs and **SFTP**, with validation, retry mechanisms, and alerting to reduce manual intervention.
- Supported migration of legacy **MD5 password storage to BCrypt**, including backward-compatible password rehashing to strengthen credential security.
- Troubleshot **production issues** through log analysis and root-cause investigation, implementing preventive fixes that improved application reliability and operational stability by roughly **25%**.
- Built maintainable applications following **SOLID principles, SonarQube quality gates, automated testing**, secure coding practices, and enterprise standards.

Projects

Artifact Comparison & Deployment Validation Tool Feb 2026 – Apr 2026
Tech Stack: Java, Spring Boot, SHA-256, File I/O

- Developed a Java/Spring Boot tool to automate staging-vs-production artifact validation using recursive directory traversal and **SHA-256 hashing**.
- Reduced large-deployment comparison time from **2 hours to 30 seconds (240x faster)**, eliminating manual folder-by-folder binary comparison.
- Independently initiated the solution to address a deployment validation bottleneck; subsequently adopted by TCS for artifact comparison across multiple clients.
- Extending the tool with **multithreaded artifact comparison** and GitLab integration to correlate changed files with recent staging-branch changes and generate a consolidated validation report.

Diyan Exports – Business Website & Management Platform Aug 2026 – Present
Tech Stack: Java, Spring Boot, Spring Data JPA, PostgreSQL, React, REST APIs

- Developed a production-oriented business platform for a spice export company using **Spring Boot, PostgreSQL, REST APIs, and React**, covering product catalog, company information, and customer inquiries.
- Built backend APIs and database models for product management, inquiry handling, and administrative workflows using **Spring Data JPA, validation, and relational database design**.
- Integrated frontend and backend components and prepared the application for **live deployment**, focusing on maintainability, responsiveness, and production readiness.

Technical Skills

Languages: Java, SQL, Python, JavaScript
Backend: Spring Boot, Spring MVC, Spring Security, Spring Data JPA, Hibernate, REST APIs, Microservices
Distributed Systems: IBM MQ, MDB/EJB, Kafka, Redis, Event-Driven Architecture, Asynchronous Processing
Databases: Oracle, MySQL
Testing & Tools: JUnit, Mockito, Maven, Git, Jenkins, SonarQube, Postman, IntelliJ IDEA, Eclipse
Cloud: AWS (EC2, S3)
Core Concepts: OOP, SOLID, Multithreading, Concurrency, Design Patterns, DSA, JWT, OAuth2

Education

L. D. College of Engineering, Ahmedabad Jul 2019 – Apr 2023
Bachelor of Engineering (B.E.) CGPA **8.71**

Certification & Achievements

AWS Certified Developer - Associate (Amazon Web Services) — **1st Runner Up** - TCS AI Fridays Hackathon Mumbai Regional Finals — **High Impact Team Award** - TCS — **Top 10%** - AI4ICPS Program, TCS x IIT Kharagpur — **Special Initiative Award** - TCS
